An AI video editor that lives on your computer and learns your style.

A FREE GUIDE

YOUR AI REEL EDITOR

Film it. AI handles the rest.

baddies knowAI

WHAT IT IS

YOUR EVENINGS, RETURNED.

An AI video editor that lives on your computer and learns your style.

FINDS THE GOLD
Spots your best moments and pitches up to 3 reels.

DOES THE CUTTING
Cuts each reel, with captions, zooms and text pop ups.

PICKS THE SONG
One to suit your taste, plus others to swap.

COVERS THE REST
Makes your covers and writes captions in your voice.

Reviews its own work before you see it. Rare in an employee.

TRY IT NOW
Your built in editor. Trim, reorder, swap the song, or give AI notes.

Play with the editor

UP TO 3 REELS | 3 COVERS | 3 HOOKS | 3 CAPTIONS IN YOUR STYLE

HOW IT WORKS

FOUR STEPS AND A PASTE.

1 GET CLAUDE CODE

Download Claude on a paid plan. Open the Code tab, top left.

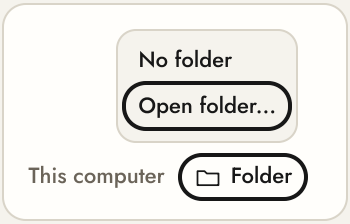

2 BUILD YOUR FOLDERS

The 3 folders I use, all in one main folder.

Logo & Brand Kit	Your brand kit, your font files, your logo with a see through background, and a photo of you called me.jpg.
Raw Videos to Use	Your videos and a song. You filmed it. That was the hard part.
Reference Videos	Your AI adds your 10 best reels and 10 you love, and learns your music taste.

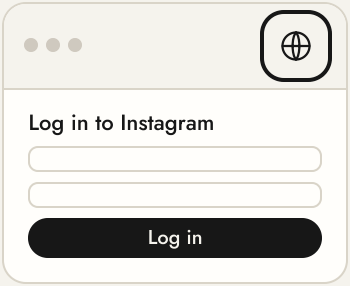

3 CONNECT YOUR FOLDER

New chat. Bottom left, click the folder, then Open folder. Pick your main folder.

4 THE SECRET SAUCE

Top right, click the globe. Log in to Instagram yourself, before you start. Your AI cannot study reels it cannot see.

GET YOUR EDITOR

Download the skill to your main folder. Paste this into your chat.

> Install the reel-editor skill from the zip file in this folder into my Claude Code skills folder. Explain each step in one plain line. Then start it.

Download the skill

Next time, type /reel-editor. Changes? Tell it, then say save to skill.

Want your reels to post themselves? Let's build your scheduling app. hello@baddiesknowai.com
